Arc Detector

电量计算  
Energy Measurement

智能小型断路器HIB201-63  
Intelligent miniature circuit breaker

## 产品概述 Profile

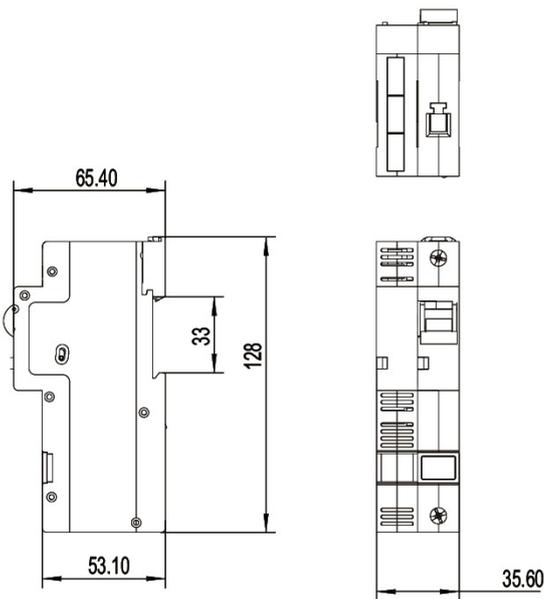

智能小型断路器HIB201-63是本公司自主研发原创产品，其将高分段小型断路器与人工智能（AI），大数据，物联网以及云端技术做完美结合，应用于多功能餐厅、会议室、报告厅、展厅等智能用电管理系统及场景，实时了解并分析用电情况，实现远程控制、电量计量、节能管理、用电异常预警与分析等功能。

Intelligent small circuit breaker HIB201-63 series is self-developed product, which is the combination of high breaking-capacity circuit breakers with artificial intelligence (AI), big data, Internet of Things(IoT)and the cloud technology, is suitable for the system and application scenarios of multi-functional rooms, meeting rooms,conference hall and exhibitions. It is featured with remote control, power energy supervision,energy measurement and alarming for power faulty by recording and analyzing the power data.

## 产品功能 Function

- (1) 产品宽度18mm，体积小，符合35mm导轨式安装；
- (2) 可扩展性接口，支持Modbus-RTU/DTL-97/DTL-07通讯协议；
- (3) 产品内置带计量的永磁继电器，
- (4) 通过RS485端口可读取用电设备的电流、电压、用电量及接线端温度等数据；
- (5) 通过RS485端口可远程控制用电设备的接通或断开操作,亦可手动接通或断开智能小型断路器和继电器；
- (6) 具有过载保护、短路保护、过欠压保护以及过温保护等功能；
- (7) 产品带状态指示功能，实时显示设备情况接通、断开以及故障情况；
- (8) 可手动或远程设置产品ID信息，方便系统对接和设置；
- (9) 产品具有可扩展性，实现漏电保护、浪涌保护等附加功能。

- 1.The product is 18mm wide and easy to DIN Rail-installation;
- 2.Support Modbus-RTU/DTL-97/DTL-07 communication protocol;
- 3.Permanent magnet relay inside with metering;
- 4.Read the data of current,voltage,power consumption and temperature of the terminal in real-time by communacation ports;
- 5.Remote control "ON/OFF"of the device and also manual control the circuit breaker and relay;
- 6.Featured with overload protection, short circuit protection, over/under voltage protection and over-temperature protection;
- 7.Indicate the status of "ON/OFF" and also fault status in real-time;
8. Manual or Remote coding the device
9. Extensible and additional functions such as leakage protection and surge protection.

## 特性参数 Parameter

额定电压 Rated Voltage	AC230V ~ 50Hz/60Hz
额定电流 Rated Current	16A, 20A, 25A, 32A, 40A, 50A, 63A
分断能力 Breaking Capacity	6kA
机械寿命 (断路器) Mechanical Life (MCB)	10,000 次 /Times
机械寿命 (继电器) Mechanical Life (RELAY)	100,000 次 /Times
计量精度 Measurement Accuracy	2%
过欠压保护值 Protection Value	过压 U <sub>ovr</sub> 250V~
	欠压 U <sub>vu</sub> 190V~
技术标准 Technical Standard	IEC60898,GB10963,JB/T10923,Q/HL1410

智能网关 Smart Hub

## 产品概述 Profile

智能网关采用自主研发的Eton-Net总线通讯方式，采用稳定可靠的从式与分式结合总线结构，可快速自动识别在线设备并检测设备用电故障，适用于多功能餐厅、会议室、报告厅、展厅以及多种复杂用电场景，具有极大的便利性。同时设备采用操作面板与执行界面的关联的列表形式。

Smart hub is featured with the controlling structure of subordinate and fraction by using self-developed bus communication mode-Eton-Net, which identifies on-line devices automatically and detects electrical failure. The communication mode is easy-practicability for the system and application scenarios of multi-functional rooms, meeting rooms, conference hall and exhibitions, controlled with both software interface and operation panels.

## 产品功能 Function

- (1) 产品可支持64个终端设备；
- (2) 支持本地或远程导入及导出数据内容；
- (3) 内置Web网页服务器，便捷化操作系统和用户体验；
- (4) 提供开放式可编程控制、下载平台软件；
- (5) 可进行多任务的并行执行功能，定时任务操作等；

1. Connect and support 64 pcs of terminal devices at most;
2. Supports local and remote connections to updating the data;
3. Built-in Web server, convenient operating system and user experience;
4. Open programmable architecture platform softwares;
5. Multi-task parallel execution, timed task operation, etc.

## 特性参数 Parameter

通讯方式 Communication Mode	TCP/IP,RS485,WIFI,NB-LOT,ZIGBEE
供电电压 Supply Power	24V DC
最大连接数量 Maximum Connections	64 只 /PCS
运行温度 Operating Temperature	-10~70℃
储存温度 Storage Temperature	0~50℃
连接方式 Connection	无线，有线，插针式 Wiring,Wireless, Pin-socket Contact

## 产品功能 Function

调光模块  
Intelligent Dimming Module

- |                    |  |
|--------------------|--|
| (1) 产品可进行多路调光；     | 1.Multiline Lighting Dimming System                      |
| (2) ID号数码智能显示；     | 2.Intelligent display ID codes;                          |
| (3) 具有短路保护功能；      | 3.With the protection of short-circuit;                  |
| (4) 配合多功能面板满足复杂场景； | 4.Multiple line Control by software and operation panels |

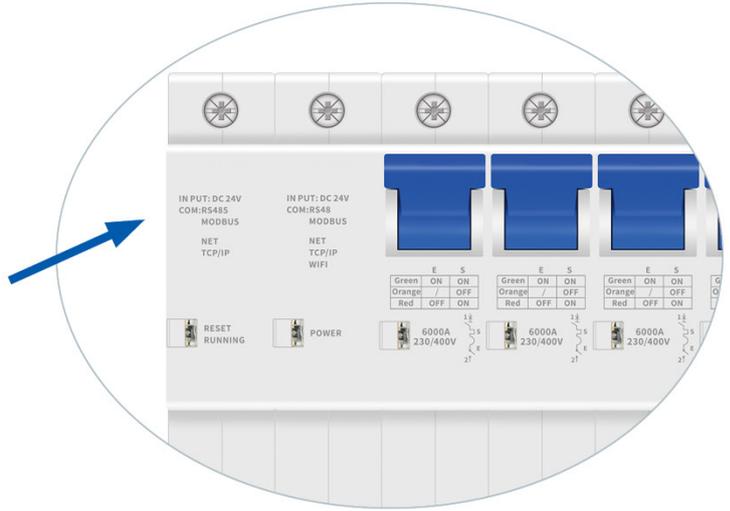

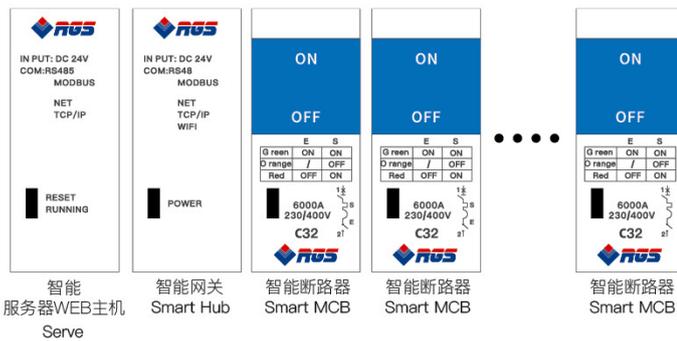

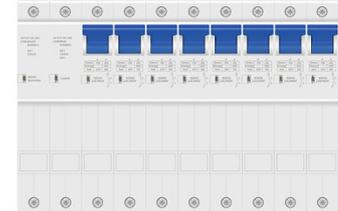

调光回路 Control Loop	2/3/4 路 (ways)
输入电压 Input Voltage	AC 220V~ 50Hz
供电电压 Supply Power	24V DC
控制端口 Control Port	Modbus

## 控制面板 Operation Panels

用电管理系统  
Electrical Safety Supervision  
and Power Energy Platform

## 智能 Smart

- 自动记录实时设备的用电情况，包括电流、电压、用电量等数据；
- 可远程定时控制设备的接通和断开；
- 可自定义设备的保护电流；
- Recording power consumption in real-time, including current, voltage, power consumption and other data;
- Remote control "ON/OFF" and timing control;
- Protection current of the device can be customized;

## 安全 Safe

- 具有过载保护、短路保护、过欠压保护、温控保护等功能；
- 可自动识别在线设备并检测设备用电故障；
- 实时指示功能，避免用户误操作；
- Featured with overload protection, short circuit protection, over/under voltage protection, temperature control protection and other functions;
- Identify online equipment and detect power failure automatically;
- Indicating the status of "ON/OFF" in real-time

## 开放 Open

- 支持多种主流通讯协议；
- 支持扩展性端口，可实现各类用户功能需要；
- 支持IOS,Android以及电脑端控制系统；
- Support a variety of mainstream protocol;
- Support expandable communication port and meet the various needs
- Support IOS,Android and PC control system;

## 便捷 Easy

- 模块化产品，简化安装操作；
- 无需对码，可直接接入系统；
- 多种接线方式，满足不同需求
- Modular product, easy to install;
- No need to coding,easy to connect;
- Multiple wiring and connection modes.
