

### Features

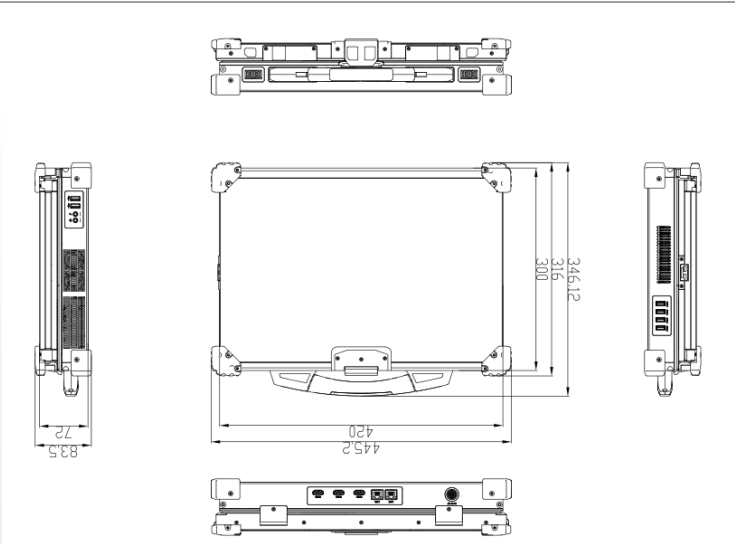

1. Using Intel HM370/QM370 chipset
2. Support Intel Coffee lake-H/Coffee lake R-H Series CPU
3. Support 3 independent displays, At the same time can be extended 3 HDMI displays
4. Using magnesium alloy, the machine is very thin and light

### Specifications

|--------------------|---------------|---------------------------------------------------------------------------------|
| Platform           | CPU           | Intel i7-8850H/i7-9850H CPU                                                     |
|                    | Chipset       | Intel HM370/QM370                                                               |
| Memory             | Type          | DDR4 2666MHz                                                                    |
|                    | Slot          | 4X 240 pin So-DIMM                                                              |
|                    | Capacity      | 128G                                                                            |
| Screen             | Quantity      | 3X17.3 寸                                                                        |
|                    | Resolution    | 1920*1080                                                                       |
| Keyboard           | Key Mapping   | 100 Key Mappings ,Full Key Board.                                               |
| Material           | Material      | Magnesium alloy                                                                 |
| Storage            | SSD           | 1X 2T M.2 NVME (PCIEX4) 2280 SSD                                                |
| External interface | HDMI          | 3X HDMI1.4 ,Max resolution support 1920*1080                                    |
|                    | USB           | 4X USB3.0, 2X USB2.0                                                            |
|                    | LAN           | 2X RJ45 LAN                                                                     |
|                    | Audio         | 1X Mic in, 1XLine in, 1XLine out                                                |
|                    | aviation plug | 1X4pin aviation plug, used for Adapter                                          |
|                    | wireless      | Support Intel 3168, Support 802.11ac                                            |
|                    | loudspeaker   | Support 2X 4Ω 2W loudspeaker                                                    |
| LED                | camera        | Support Front 500MP camera                                                      |
|                    | LED           | 1X HDD LED, 1XBAT LED, 1XWIFI LED, 1XBT LED, 1XCaps Lock LED, 1XMouse Board LED |
| Extension          | U.2           | 1X U.2 interface, An AI card can be extended.                                   |
| Weight             | Net weight    | 6Kg                                                                             |
| Power              | Power         | 19V/150W Adapter                                                                |
|                    | Battery       | 8400mAH                                                                         |
| Environment        | Dimension     | 346mmX445mmX84mm                                                                |
|                    | Temperature   | Working Temperature: 0-55°C; Storage Temperature: -40-85°C                      |
|                    | Humidity      | 5%-95%,No-Condensation                                                          |
| OS                 | OS            | 1.Support Windows10 OS;2. Support Intel TXT and AMT Technology                  |
