

Liquid ring vacuum pumps 液环式真空泵

With motor carrier design 带电机托架设计

VLA 90, 125, 150, 250, 325, 425

VLE 95, 130, 155, 255

VLG 95, 130, 155

PRESSURE RANGE:

入口压力范围: 33 - 1013 mbar

SUCTION VOLUME:

入口流量: 32 - 470 m³/h

CONSTRUCTION TYPE

结构型式

ABS liquid ring vacuum pumps are displacement pumps of uncomplicated and robust construction with the following particular features:

ABS 液环式真空泵是结构简单使用可靠的容积变化式泵，具有如下特点：

nearly isothermal compression
几乎等温压缩

oil-free, as no lubrication in the working chamber
therefore non-polluting
在工作腔内无需润滑，因而绝对无油，无污染

Capable of handling of nearly all gases and vapours
可处理几乎所有的气体和蒸汽

small quantities of entrained liquid can be handled
可处理少量的夹带液体

easy maintenance and reliable operation
易维护，高可靠性

low noise and nearly free from vibration
低噪音，几乎无振动

wide choice of materials, therefore applicable nearly everywhere
广泛的材质选择，基本上可用于所有场合

shaft not in contact with the medium
轴不接触介质

protection against cavitation as standard
气蚀保护作为标准配置

incorporated dirt drain
一体式排污

no metallic contact of the rotating parts
旋转部件没有金属接触

ABS liquid ring vacuum pumps VL are single-stage
ABS VL 系列液环式真空泵是单级泵。

NOTE

注意事项

During operation the pump must be supplied continuously with service liquid, normally water, in order to eliminate the heat resulting from the gas compression and to replenish the liquid ring, because part of the liquid is leaving the pump together with the gas. This liquid can be separated from the gas in a liquid separator (see last page) and reused.

The pumps are equipped with a connection through which the contaminated service liquid can be drained continuously during operation (dirt drain), if necessary.

泵运转期间需连续不断地补充工作液（通常为水），以带走气体压缩而产生的热量和补充部分随气体排出的工作液。此部分工作液可在气液分离器中与气体分开（请见样本附件部分），以重新利用。

泵可按需要配备连接管线，以保证在运转条件下连续地排放被污染的工作液。

The direction of rotation is clockwise, when looking from the motor towards the pump.

从泵的驱动端看，泵的旋转方向为顺时针。

APPLICATION

应用

Handling and exhausting of dry and humid gases; entrained liquid can be handled during normal duty. The pumps are applied in all fields where a pressure of 33 to 900 mbar must be generated

干气和湿气的处理和抽除；正常条件下可处理夹带少量的液体。此真空泵可用于所有需要33 mbar到900 mbar的场合。
