# OBDLink SX
Quick Start Guide

Windows
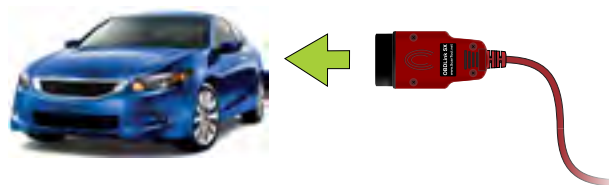

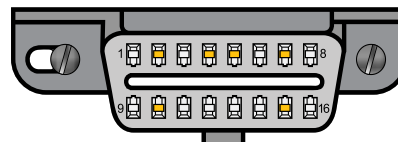

---

2   Connect OBDLink SX to the **PC**

The LED will turn **yellow** when you connect OBDLink SX to the PC's USB port.

— *Red LED? Drivers were not installed properly.*

---

4   Turn ignition to **Key On, Engine Off**

The LED will turn **green**.

Vehicles with push button start: press the button without stepping on the brake pedal.

— *Yellow LED? Check for blown fuses.*
   (OBD port, auxiliary port, and the cigarette lighter).

---

5   Launch **OBDwiz software**

Click **Start > Programs > OBDwiz > OBDwiz.**

---

1   Install **OBDwiz software**

 Point your browser to **obdlink.com/software**

Download **"OBDwiz for Windows"**.
Run the installer to set up the software.

---

3   Plug OBDLink SX into the **OBD port**

The OBD port is usually found on the driver's side, under the dash.

---

6   **Activate** OBDwiz

Click the **'Connect'** button:

Follow the prompts to activate the software and begin using your OBDLink SX.
