VL21-63 Thermosetting RCCB

General introduction

Function

VL21-63 series RCCB(without overcurrent protection)applies to AC 50Hz, rated voltage 240V 2 poles, 415V 4 poles, rated current up to 63A. When electric shock occurs to human or leakage current in grid exceeds stipulated values, RCCB cuts off the fault power in a very short time to protect the safety of human and electrical equipments. It can also function as non frequently switching of circuits.

Application

Industry and commercial buildings, high-rise buildings and residential houses, etc.

Conforms to standard

IEC/EN 61008-1
