

3300 XL 25 mm Proximity Transducer System

Bently Nevada* Asset Condition Monitoring

Patents: 5,016,343; 5,126,664;
5,351,388; 5,685,884

Description

The 3300 XL 25 mm Transducer System consists of a separate 25 mm probe, an extension cable, and a 3300 XL 25 mm Proximitor* Sensor. The 0.787 V/mm (20 mV/mil) output gives this system a linear range of 12.7 mm (500 mils). Based on this linear range, the 3300 XL 25 mm Transducer System is suitable for measuring differential expansion (DE) on mid-size to large steam turbine generators caused by the difference in growth rates between the turbine rotor and the machine stator (casing).

Measuring Differential Expansion (DE)

The Differential Expansion measurement is made by two proximity transducers observing a collar or ramp some distance from the thrust bearing. Typical transducer mounting arrangements are:

- Two transducers observing the same side of a collar.
- Two complementary input transducers observing opposite sides of a collar, effectively doubling the measurable DE range.

Two transducers with at least one transducer viewing a ramp on a rotor and the second transducer viewing either a separate ramp or a different location on the rotor to compensate for radial movement. This arrangement adds some error to the measurement, but can measure a longer total DE distance than the complementary measurement.

The criteria for selecting a mounting method are the size of the available target, the expected amount of rotor axial movement and the type of DE target that exists in the machine (collar versus ramp). If sufficient collar height is available, two transducers observing the same side of a collar is the preferred configuration. These two transducers provide redundant measurements.

System Compatibility

The 3300 XL 25 mm probe comes in a large variety of case configurations to physically replace all standard 7200 25 mm, 7200 35 mm and 25 mm DE Integral transducer systems (including side and rear exit probes). The Proximitor Sensor also has an output that is identical to that of the 7200 and 25 mm DE Integral systems, allowing customers to upgrade without requiring any changes in the monitor configuration. When upgrading from previous systems, every transducer system component (probe, extension cable, and Proximitor Sensor) must be replaced with 3300 XL 25 mm components.

Specifications and Ordering Information
Part Number 163236
Rev. E (07/12)

Proximity Probe and Extension Cable

The 3300 XL 25 mm probe is designed for maximum survivability in the harshest steam turbine DE environments. It can continually operate and maintain its accuracy in high temperatures up to 200 °C (392 °F), and can withstand intermittent high temperatures up to 250 °C (482 °F). The 25 mm probe has both a front and rear seal which, combined with the FluidLoc* cable (standard on all 25 mm probes), prevents moisture from entering the probe tip. Special high-temperature ClickLoc* connectors are also standard on the probe and extension cable. Each probe and cable are provided with connector protectors and a disposable connector protector installation tool to ensure that the connectors remain free of contamination. The ClickLoc connector on the probe lead has a removable collar that facilitates routing the cable through tight clearances.

The 3300 XL 25 mm probe is available in many probe case styles, including 1¼-12 or 1½-12 English threads, M30x2 or M39x1.5 metric threads, or side or rear exit probes with a 1.06 or 1.50 inch diameter smooth probe case. Additionally, threaded 3300 XL 25 mm probe cases come standard with a locknut with predrilled safety wire holes.

Proximitar Sensor

The 3300 XL 25 mm Proximitar Sensor¹ has the same advanced features as our previous 3300 XL Proximitar Sensors. Its thin design allows it to be mounted in either a high-density DIN-rail installation or a more traditional panel mount configuration. Improved RFI/EMI immunity allows the 3300 XL Proximitar Sensor to achieve European CE mark approvals without any special mounting considerations. This RFI immunity also prevents the transducer system from being adversely affected by nearby high frequency radio signals. SpringLoc* terminal strips on the Proximitar Sensor require no special installation tools and facilitate faster, highly robust field wiring connections.

Notes:

Proximitar Sensors are supplied by default from the factory calibrated to AISI 4140 steel. Calibration to other target materials is available upon request.

Mounting Accessories

The correct operation of the transducer system must be verified during installation, and periodically after installation, by physically moving it to simulate the motion of the shaft collar. This requires a mounting bracket that allows the transducer system to slide relative to the shaft rotor and collar.

An optional 3300 XL Sliding Bracket can be ordered for the 25 mm Differential Expansion Transducer for both single transducer and complementary input applications. This mounting bracket makes it easy to accurately verify the transducer system and gap the probes by allowing you to slide the transducer system throughout its linear range. The base plate of the sliding bracket is installed on the inner surface of the turbine case near the differential expansion collar. Probes are installed in the applicable probe adapter, which attaches to the sliding carriage. The sliding carriage slides onto and is secured to the base plate with bolts and safety wire. To verify and install the transducer, loosen the bolts securing the sliding carriage to the base plate and move the sliding carriage and probes. A Dial Indicator Verification Kit accessory provides a reference by measuring the movement of the sliding carriage. The 3300 XL Sliding Bracket helps ensure that the transducer system remains aligned with and perpendicular to the rotor.

Specifications

Unless otherwise noted, the following specifications are for a 3300 XL 25 mm Proximitar Sensor, extension cable and probe between 0°C and +45°C (+32°F to +113°F), with a -24 Vdc power supply, a 10 kΩ load, a Bently Nevada supplied AISI 4140 steel target that is 61 mm (2.4 in) diameter or larger, and a probe gap of 7.0 mm (275 mils). The system accuracy and interchangeability specifications do not apply when using a transducer system calibrated to any target other than a Bently Nevada AISI 4140 steel target.

Electrical

Proximitar Sensor Input

Accepts one noncontacting 3300 XL 25 mm Proximity Probe and Extension Cable.

Power

Requires -17.5 Vdc to -26 Vdc without barriers at 12 mA maximum consumption, -23 Vdc to -26 Vdc with barriers. Operation at a more positive voltage than -23.5 Vdc can result in reduced linear range.

**Supply
Sensitivity**

Less than 2 mV change in output voltage per volt change in input voltage.

**Output
resistance**

50 Ω

**Probe dc
resistance:**

Probe Length (m)	Resistance from the Center Conductor to the Outer Conductor (R_{PROBE}) (ohms)
1.0	6.2 ± 0.5
5.0	7.5 ± 0.8
9.0	8.8 ± 1.1

Extension cable dc resistance:

Length of Extension Cable (m)	Resistance from Center Conductor to Center Conductor (R_{CORE}) (ohms)	Resistance from Coaxial Conductor to Coaxial Conductor (R_{JACKET}) (ohms)
4.0	1.0 ± 0.25	0.3 ± 0.1
8.0	2.0 ± 0.5	0.6 ± 0.2

**Extension cable
capacitance:**

69.9 pF/m (21.3 pF/ft) typical

Field wiring:

0.2 to 1.5 mm² (16 to 24 AWG) [0.25 to 0.75 mm² (18 to 23 AWG) with ferrules]. Recommend using three-conductor shielded triad cable. Maximum length of 305 metres (1,000 feet) between the 3300 XL Proximity Sensor and the monitor. See the frequency response graph for signal rolloff at high frequencies when using longer field wiring lengths.

Linear Range:

12.7 mm (500 mils). Linear range begins at approximately 0.63 mm (25 mils) from target and is from 0.63 to 13.33 mm (25 to 525 mils) (approximately -1.5 to -11.5 Vdc).

**Average Scale
Factor (ASF)**

0.787 V/mm (20 mV/mil) nominal

**Deviation from
best fit straight
line (DSL)**

Less than ± 0.31 mm (± 12 mils)

**System
performance
over extended
temperatures:**

Over a probe temperature range of -35°C to +120°C (-31°F to +248°F) with the Proximity Sensor and extension cable between 0°C to +45°C (+32°F to +113°F), the DSL remains within ± 0.92 mm (± 36 mils).

Over a Proximity Sensor and extension cable temperature range of -35°C to +65°C (-31°F to +149°F) with the probe between 0°C to +45°C (+32°F to +113°F), the DSL remains within ± 0.92 mm (± 36 mils).

**Frequency
Response:**

0 to 2.7 kHz: +0, -3 dB typical, with up to 305 metres (1000 feet) of field wiring.

**Recommended
Minimum
Target Size:**

61 mm (2.4 in) diameter (flat target)

Effects of 60 Hz Magnetic Fields Up to 300 Gauss (5 metre system):

Output voltage in millivolts/gauss:

Gap	Proximity Sensor	Probe	Ext. Cable
0.6 mm (25 mil)	0.224	0.008	0.002
7.0 mm (275 mil)	0.223	0.033	0.004
13.3 mm (525 mil)	0.225	0.076	0.023

Electrical Classification:

Complies with the European CE mark.

Hazardous Area Approvals

Multiple approvals for hazardous areas certified by Canadian Standards Association (CSA/NRTL/C) in North America and by Baseefa (2001) Ltd. in Europe.

North America:

Ex ia IIC T4/T5; Class I Zone 0 or Class 1 Division 1; Groups A, B, C, and D, when installed with intrinsically safe zener barriers per drawing 141092 or when installed with galvanic isolators.

Ex nA IIC T4/T5 Class I Zone 2 or Class I, Division 2, Groups A, B, C, and D when installed without barriers per drawing 140979.

T5 @ Ta = -35 °C to +85 °C.

T4 @ Ta = -51 °C to +100 °C.

Europe:

 II 1 G EEx ia IIC T4/T5. EC certificate number BAS99ATEX1101, when installed per drawing 141092.

 II 3 G EEx nA II T4/T5. EC certificate number BAS99ATEX3100U, when installed per drawing 140979.

T5 @ Ta = -35 °C to +85 °C

T4 @ Ta = -51 °C to +100 °C.

Mechanical

Probe Tip Material:

Polyetheretherketone (PEEK).

Probe Case Material:

AISI 304 stainless steel (SST).

Probe Cable Specifications:

75 Ω triaxial, perfluoroalkoxyethylene (PFA) insulated FluidLoc probe cable in the following total probe lengths: 1, 5 or 9 metres.

Extension Cable Material:

75 Ω triaxial, perfluoroalkoxyethylene (PFA) insulated FluidLoc cable.

Proximity Sensor Material:

A380 aluminum

Sliding Bracket Material:

Anodized aluminum and stainless steel

**Sliding Bracket
Adjustment
Range**

Short bracket horizontal: ± 25.4 mm (± 1.0 in.)

Long bracket horizontal: ± 76.2 mm (± 3.0 in.)

Probe adapter vertical adjustment: 25.4 mm (1.00 in) total travel

System Length:

5 or 9 metres including extension cable

**Probe and
Extension Cable
Armor
(optional):**

Flexible AISI 302 SST with PFA outer jacket.

**Tensile Strength
(maximum
rated):**

330 N (75 pounds) probe case to probe lead. 270 N (60 pounds) at probe lead to extension cable connectors.

**Connector
material:**

Gold-plated brass and gold-plated beryllium copper

Torque Specifications

Description	Maximum Rated	Recommended
All threaded probe cases	163 N•m (120 ft•lb)	68 N•m (50 ft•lb)
M5x.8 sliding bracket cap screws	9.6 N•m (85 in•lb)	7.3 N•m (65 in•lb)
M6x1 sliding bracket cap screw (probe clamp)	10.7 N•m (95 in•lb)	7.3 N•m (65 in•lb)

Connector-to-connector torque

**Recommended
torque:**

Finger tight

**Maximum
torque:**

0.565 N•m (5 in•lb)

**Minimum Bend
Radius (with or
without sst
armor):**

25.4 mm (1.0 in)

System Mass (typical):

Probe:

230 g (8.1 oz) (minimum length case, 1m lead, no armor)

330 g (11.6 oz) (minimum length case, 1m lead, with armor)

For longer case lengths add 5.7 g/mm (5.1 oz/in).

For 5 m probe length add 180 g (6.3 oz) for non-armored probe or 620 g (22 oz) for armored probe.

For 9 m probe length add 360 g (13 oz) for non-armored probe or 1240 g (44 oz) for armored probe.

Extension Cable:

45 g/m (0.5 oz/ft)

**Armored
Extension cable:**

140 g/m (1.5 oz/ft)

**Proximator
Sensor:**

255 g (9 oz)

Sliding Bracket:

Short with one probe adapter:
580 g (20.5 oz)

Long with two probe adapters:
1500 g (53 oz)

Relative

Humidity:

100% condensing, non-submersible when connectors are protected. Tested to IEC 68-2-3 damp heat.

Probe Pressure:

3300 XL probes are designed to seal differential pressure between the probe tip and case. The probe sealing material consists of a Viton® O-ring and compression seal. Probes are not pressure tested prior to shipment. Contact our custom design department if you require a test of the pressure seal for your application

Note: It is the responsibility of the customer or user to ensure that all liquids and gases are contained and safely controlled should leakage occur from a proximity probe. In addition, solutions with high or low pH values may erode the tip assembly of the probe causing media leakage into surrounding areas. Bently Nevada, Inc. will not be held responsible for any damages resulting from leaking 3300 XL proximity probes. In addition, 3300 XL proximity probes will not be replaced under the service plan due to probe leakage.

Ordering Information

3300 XL 25 mm Proximity Probe:

330851-AXX-BXXX-CXXX-DXX-EXX-FXX

A: Probe Case Type Option

Note: Standard case types are 01 through 04.

- | | |
|-----------|--------------------------------|
| 01 | 1¼ -12 Thread |
| 02 | M30x2 Thread |
| 03 | Smooth 1.06 in dia - Rear Exit |
| 04 | Smooth 1.06 in dia - Side Exit |
| 05 | 1½ -12 Thread |
| 06 | M39x1.5 Thread |
| 07 | Smooth 1.5 in. dia - Rear Exit |
| 08 | Smooth 1.5 in. dia - Side Exit |

B: Unthreaded Length Option

Note: Standard unthreaded length is 0.0 mm or 0.0 in. There is an additional charge for non-standard unthreaded lengths.

Unthreaded length must be at least 26 mm or 1.0 inch less than the case length.

Unthreaded length option is 0.0 in. for smooth case probe types.

Metric Case Types:

Order in increments of 2 mm.

Maximum
unthreaded
length:

224 mm

Minimum
unthreaded
length:

0 mm

Example:

0 5 0 = 50 mm

English Case
Types:

Order in increments of 0.1 in.

Maximum
unthreaded
length:

8.9 in.

Minimum
unthreaded
length:

0.0 in.

Example:

0 2 5 = 2.5 in.

C: Overall Case Length Option

Note: Standard case lengths are 26, 40, 60, 80, 100 and 250 mm for metric cases and 1.0, 2.0, 3.0, 4.0 and 9.9 in. for English cases. There is an additional charge for non-standard case lengths.

Metric Case
Types:

Order in increments of 2 mm

Maximum case
length:

250 mm

Minimum case
length:

26 mm

Example:

0 5 0 = 50 mm

English and
Smooth Case
Types:

Order in increments of 0.1 in

Maximum case
length:

9.9 in

Minimum case
length:

1.0 in (1.5 in for side exit case types)

Example:

0 2 0 = 2.0 in

D: Total Length Option

10 1.0 metre (3.3 feet)
50 5.0 metres (16.4 feet)
90 9.0 metres (29.5 feet)

Note: Five metre probes are designed for use with the five metre Proximitor Sensor only.

E: Armor Option

00 No Armor
01 with SST Armor

Note: When ordering SST Armor, the minimum probe length is 28 mm or 1.1 inch.

F: Agency Approval Option

00 No Approvals
05 Multiple Approvals

Note: For a shorter delivery time, order commonly stocked **multi-approvals** probes. Currently, stocked probes consist of the following part numbers:
330851-01-000-020-10-00-05
330851-01-000-030-10-00-05
330851-02-000-040-10-00-05
330851-02-000-080-10-00-05
330851-04-000-015-10-00-05
330851-04-000-020-10-00-05

3300 XL 25 mm Proximito Sensor

330850-AXX-BXX

A: Total Length and Mounting Option

- | | |
|------------|---|
| 5 0 | 5.0 metres (16.4 feet) system length, panel mount |
| 5 1 | 5.0 metres (16.4 feet) system length, DIN mount |
| 9 0 | 9.0 metres (29.5 feet) system length, panel mount |
| 9 1 | 9.0 metres (29.5 feet) system length, DIN mount |

B: Agency Approval Option

- | | |
|------------|--------------------|
| 0 0 | No Approvals |
| 0 5 | Multiple Approvals |

3300 XL 25 mm Extension Cable

330854-AXXX-BXX-CXX

Note: Make sure that the extension cable length and the probe length, when added together, equal the Proximito Sensor total length.

A: Cable Length Option

- | | |
|--------------|------------------------|
| 0 4 0 | 4.0 metres (13.1 feet) |
| 0 8 0 | 8.0 metres (26.2 feet) |

B: Armor and Cable Option

- | | |
|------------|---|
| 2 4 | High Temperature FluidLoc cable |
| 2 5 | Armored High Temperature FluidLoc cable |

C: Agency Approval Option

- | | |
|------------|--------------------|
| 0 0 | No Approvals |
| 0 5 | Multiple Approvals |

3300 XL Sliding Bracket

330853-AXX-BXX

A: Bracket Length Option

- | | |
|------------|---|
| 0 1 | Short – Single Differential Expansion Application |
| 0 2 | Long – Complementary Input Differential Expansion Application |

B: Probe Adapter Option

- | | |
|------------|-------------------------|
| 0 0 | Adapter not supplied |
| 0 1 | 1¼-12 Thread |
| 0 2 | M30x2 Thread |
| 0 3 | 1.06 in diameter Smooth |

Note: When probe adapters are selected, one is supplied with the short bracket length and two are supplied with the long bracket length.

Dial Indicator Verification Kit

The dial indicator verification kit contains all of the parts needed to verify accuracy of a differential expansion installation. The kit contains a dial indicator, magnetic base, flex mounting arm, and indicator holding rod all housed in a protective carry case

163854-AXX

A: Measurement Units Option

- | | |
|------------|--------------------------|
| 0 1 | English Units (0–2 Inch) |
| 0 2 | Metric Units (0–50 mm) |

Accessories

Manual

161984

Performance Specification

148722-01

3300 XL Test Plug. The 3300 XL Test Plug has three self-contained test pins attached to three color-coded wires 1 metre in length, each terminated in a banana plug. The three-pin adapter plugs into the test pin holes on 3300 XL-style Proximito sensors. It is used to check the performance of the Proximito sensor from the test pin holes in the terminal strip without requiring the removal of the field wiring.

330187

Extended Range Micrometer Kit.

The extended range micrometer kit contains a precision micrometer and AISI 4140 target and is intended for acceptance testing of our Bently Nevada extended range transducers. Bracket options are available to hold 8mm – 35mm probes and also the 50 mm DE transducer.

02120015

Bulk field wire. 1.0 mm² (18 AWG), 3 conductor, twisted, shielded cable with drain wire. Specify length in feet.

02173009

Bulk field wire. 1.0 mm² (18 AWG), 3 conductor, twisted, shielded cable. Specify length in feet.

138492-01

Replacement panel-mount mounting pad

138493-01

Replacement DIN-mount mounting pad

04310310

3300 XL Proximito Sensor Panel-mount Screws. Package includes four 6-32 UNC thread forming mounting screws (Supplied standard with 3300 XL Proximito Housings [3300 XL option]).

03200006

Silicone self-fusing tape. A 9.1 metre (10 yard) roll of silicone tape to protect connectors. It is easy to install and provides excellent electrical isolation and protection from the environment. It is not recommended for use inside the casing of the machine.

40113-02

Connector Protector Kit. Connector Protector Kit for 3300 XL probes and extension cables, including connector protectors and installation tools.

29660-01

Transducer Clamp. Optional mounting clamp for the 1.06" dia smooth 3300 XL 25mm probe case types (-03 and -04 only).

136536-01

Connector Protector Adapter. Makes our previous 3300 connector protector kits compatible with 3300 XL probes and extension cable connectors.

40180-02

Connector Protectors. Package contains 10 pairs of connector protectors.

03839410

Male Connector Protector. Placed on the extension cable to connect to the female connector protector on the probe and provide environmental protection of connectors.

03839420

Female Connector Protector. Placed on the probe lead to connect to the male connector protector on the extension cable and provide environmental protection of connectors. Also placed on the extension cable to slide over the Proximito Sensor connection and protect it from the environment.

330153-08

3300 XL 25 mm Connector Kit. Used on 3300 XL 25 mm probes and extension cables. Contains one male (removable nut) and female ClickLoc connectors, color-coded sleeves and two pieces slit PFA tubing.

163356

Connector Crimp Tool Kit. Includes one set of multi-connector inserts and connector installation instructions. Supplied with carrying case.
