

Industrial Tools

PTF SERIES

Power and Precision

*The Best in Class
combination of Cost
and Quality*

More Than Productivity

PTF

Non shut off series

Lightweight and low vibration make it the perfect choice for any operation where an impact tool is used

Productivity

- Fast run down, short cycle time
- One hand operation
- High power/weight ratio

Reliability

- Low air pressure operation
- Constant torque with oil accumulator

All models : Air inlet 1/4" PT

Torque values are recommended for a working pressure of 6.3 bar (90PSI)

Made in Japan

PTF Shut off series

Accuracy

- Improved accuracy vs impact tools
- Minimize joint relaxation

Ergonomics

- Virtually reaction free
- Low noise/vibration
- Low weight
- Low trigger load on operator finger

series

Reduce operator influence with a shutoff system and guarantee the assembly at the specified torque
