## 3) Q&A

### Instructor Introduction

### Henry

He has more than 20 years of experience in supply chain management and leading digital applications on both side A and side B. He specializes in building supply chain management systems from scratch and in sustainable optimization and improvement. He has built an efficient and collaborative digital system platform and established an end-to-end supply chain visualization system. He focuses on promoting the digital application of supply chain led by business departments and improving the data culture of enterprises.

He was the head of Maersk's logistics operation department and the head of contract logistics department; the head of logistics project in Bosch (China) headquarters; and the logistics director of Ortolive China. Currently, he is the Senior Supply Chain Solution Specialist of Maersk Greater China.
