Event Name: Digital Transformation in Supply Chains: Embracing 4IR Technologie

Venue: online ; Event No. 23420 ; Date & Time: June. 28, 2023; 20:00-21:30

Event Hours: 1.5h ; Professional Development Points: 1.5

Event Introduction

This webinar focusing on the Digital Transformation in Supply Chains: Embracing 4IR Technologie. The theme background of this seminar is that becoming a semiconductor manufacturer has become extremely challenging nowadays. Previously, low-cost industrial zones were facing issues of rising wages and energy prices, as well as rising capital expenditures. At the same time, market competition is becoming increasingly fierce, and a large number of new

上海史考姆企业管理咨询有限公司 上海市七莘路1839号财富108广场南座2316 邮政编码201101 电话86-21-54281551

business participants have emerged. Faced with these changes, industry participants are understandably anxious as they have been seeking to achieve the next wave of productivity growth through record breaking mergers and acquisitions. However, most backend factories located in emerging countries have not yet adopted Industry 4.0 technology in their critical businesses, including the cutting, assembly, testing, and packaging of individual semiconductor wafers.

Instructor Introduction

Chunan Tong

Chunan Tong, from Shanghai, China, obtained a master's degree in supply chain management and logistics from the University of Maryland. And he holds CSCP, CTL, and IBM Advanced Data Science certificates. He has years of experience in supply chain work and has held management and engineering positions in several well-known companies.

Currently working in the supply chain planning and production department of Western Data Company, responsible for some project work related to supply chain IT. Designed and developed a real-time dashboard system and a wafer sorting system, and also conducted research on warehouse inventory management.
