**Event Name:** How to mitigate the impact of epidemic situation on the elasticity and stability of supply chain through supply chain risk management measures

**Venue:** Online; **Event No.** 21308; **Date & Time:** May 26,2021;20:00-21:00

**Event Hours:** 1h; **Professional Development Points:** 1

### Event Introduction :

In this lecture Professor Salomé Rue will tell the role of supply chain risk management (SCRM) in mitigating the effects of disruptions impacts on supply chain resilience and robustness in the context of COVID-19 outbreak. Using structural equation modeling on a survey data from 470 French firms, the results confirm the basic tenets of resource-based view and organizational information processing theories regarding the combination of dynamic resources to face disruptions' uncertainty. Register to attend the online master class of KEDGE-SJTU Global MBA Programme.
