Event Description:

The poster hyperlink: <http://event.31huiyi.com/2032286415>

Event Name: The characteristics of supply chain management in prefabricated construction industry

Venue: Online; **Event No.** 21302; **Date & Time:** April 15, 2021;20:00-21:30

Event Hours: 1.5h; **Professional Development Points:** 1.5

Event Introduction :

1. Definition of prefabricated building
2. The difference between prefabricated buildings and traditional buildings
3. Several types of mainstream prefabricated buildings
4. The application and development direction of BIM technology in prefabricated buildings
5. Comparison of the supply chain of the traditional construction industry and the supply chain of prefabricated buildings
6. Discussion on the informatization and digitization mode of prefabricated buildings
7. Q&A

Instructor Introduction

Ruxing Zhao

BIM Senior Engineer

Longlong Zhu

Good at large-scale mechanical and electrical engineering project management, workshop production management, procurement and warehouse management, digital information technology and planning various digital production lines
