Event Name: Workshop on Sustainable Supply Chain Development Roadmap

Venue: Shanghai ; Event No. 23630 ; Date & Time: June. 30, 2023; 14:00-17:00

Event Hours: 3h ; Professional Development Points: 3

Event Introduction

Join us for a 3 hour webinar focusing on the Sustainable Supply Chain Development Roadmap. Sustainable supply chain is a sustainable business model that involves environmental, social, and governance risks. By optimizing and improving various aspects of the supply chain (procurement, production, logistics, collaboration, etc.), as well as suppliers, customers, and other partners, it continuously improves its sustainability and competitiveness, achieves a balance of economic, social, and environmental benefits, and achieves the long-term goal of sustainable development.

However, supply chain managers still have a lot of doubts about how to establish overall sustainable development management goals and methods in the enterprise's supply chain system, how to implement sustainable development in various links of the supply chain, and how to calculate carbon emissions in logistics management. There are also many tools and plans to be implemented.

To this end, the SCOM Supply Chain and Operations Managers Club will invite relevant authoritative professionals to share and discuss sustainable supply chain content, methods, business models, practical experience, and insights.

Instructor Introduction

Mike Fu

Mike Fu has a Master of Laws, a Bachelor of Law degree and a professional background in engineering, and is good at enterprise intellectual property, EHS and commercial legal services.

Joe Yuan

Joe Yuan has nearly 20 years of experience in the supply chain field of Fortune Global 500 enterprises, as well as many years of overseas learning and training experience. Currently, he is the only APICS authorized "Sustainable Supply Chain Professional Course" mentor in China.

Daniel Gao

Daniel Gao has a double degree of MBA and Master of Engineering from Shanghai Jiaotong University. He has over 10 years of management experience in international supply chain and logistics industry practice and educational research.

Su Song

Su Song is a researcher at the China Department of Sustainable Cities at the World Resources Institute, mainly responsible for research on transportation economy and policies.
