

New Generation Mobile Vehicle-Mounted Substation

Ultra-Safe Ultra-Smart

- The total length: less than 12 meters
- Making long-distance and all-road transportation easier
- Adopts the **BIIT transformer bushing** (over 30,000 units and 20 years of operational experience)
- Uses pole-type circuit breakers

Currently mainstream vehicle-mounted mobile substations

Integrated vehicle-mounted substations can reach a vehicle length of 18 meters, with heavier and longer bodies, which imposes higher requirements on transportation roads and vehicles.
