Features

Easy Installation Clip (Cover)

- No screws needed for hassle-free installation
- Simple hold-and-press clip mechanism
- Saves time with no additional tools required
- Eliminates potential risk of rusty screws

Fully Covered

- Protects all gauges from potential damage
- Dedicated space for filter change tools for easy access and management

(Optional) Back Cover

- Ideal for ground mounting
- Provides complete protection for the housing system
- Available at a nominal extra cost

Stainless Steel Cover

- Durable and long-lasting
- Provides UV protection
- Anti-corrosion feature ensures longevity
- Sleek and modern design enhances aesthetics

Brass Connector

- Heavy-duty design to handle higher water pressures
- More resilient than plastic connectors, won't crack easily
- Anti-corrosion property prevents second-time contamination

Stainless Steel Glass Gauge

- Designed for longevity
- Equipped with UV protection and anti-corrosion features

Full-sized and Genuine 20 inch x 4.5 inch Housing

- Double the water contact surface for enhanced performance
- Extends filter lifespan, resulting in cost savings
- Made of food-grade material for safety
- No restrictive fittings, giving customers the freedom to choose filter suppliers

Double O-Ring

- Expertly designed to prevent leaks
- Offers a dual-layer of safety for enhanced security
- Ensures users are doubly protected against potential malfunctions and water wastage

Stainless Steel Frame and Housing Enforce Plate

- Built tough to prevent pipe breakage during filter changes
- Offers superior durability compared to plastic-only frames

WAA Whole House Water Filtration System

Introducing the WAA Australian Made Filter, coming soon! Proudly crafted with locally sourced materials and upholding the highest Australian standards. Our FuturePure Protection program ensures a better filter with every change, delivering superior quality, stringent safety, and sustainability. Stay tuned for the launch of this exceptional product.

Sediment Filter

- Uses advanced 3-layer technology for optimal water flow
- Achieves up to 1-micron filtration accuracy
- Made of food-grade material for enhanced safety
- Comes with a lifetime free supply, saving customers money in the long run

Heavy Metal Reduction & Taste Improvement Carbon Filter

- Features KDF 55, which effectively reduces heavy metals
- Contains natural coconut carbon for superior taste and longevity
- Ensures a lifespan of up to 18 months

Limescale Reduction & Taste Improvement Carbon Filter

- Incorporates limescale reduction media that more efficient than traditional methods
- Achieves up to 1-micron filtration accuracy for purer water
- Lasts up to 18 months
- Contains natural coconut carbon for enhanced taste and extended lifespan

Technical Data

Model	Water Filter		
Description	Full Home Water Refining System		
Dimensions	33cm (H) x 10cm (W) x 20cm (D)		
Water Pressure	0.1-0.6Mpa	IRON	Max 0.2 ppm
Water Temperature*	*5 °C – 35 °C	TDS	<1800 ppm
Total Net Water	100,000L	Operating Flow Rates	50-60 L/min

Model	Osmosis System		
Description	Part 2: Under Sink Reverse Osmosis System		
Dimensions	34cm (H) x 23cm (W) x 23cm (D)		
Water Pressure	0.3-0.7MPa/40-100psi	IRON	Max 0.2 ppm
Water Temperature*	5-35°C/40-100a	TDS	<1800 ppm
Fast Flow Rate	0.5GPM (1.8L/M)	Turbidity	<5 NTU
Total Net Water	2,000L	PH Parameters	2-11
Tanks	3.0G	RO Specifications	75GPD

*Circulated underground not surface temperature

Filter Change	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5	Stage 6
Max	Free every 6 months	18 Months	18 Months	36 Months	18 Months	18 Months
Recommended		12 Months	12 Months	24 Months	12 Months	12 Months
