Product Description

The Embedded Serial Server ATC-3000 is a gateway between Ethernet (TCP/IP) and serial device. It can be built into any facilities or equipments, and converts any serial port to Ethernet network. By using this unit, limited distance, point-to-point, direct serial connections can now be extended to the facility or equipment. In the industrial and manufacturing automation, ATC-3000 can be embedded into most field devices, include PLC, HMI, Bar-code Scanners and so on. Flexible configuration options allow the unit to be setup remotely over Ethernet by Telnet, web browser, or other windows utilities. It is not only a transparent, cost effective, network-enabled serial device, but also it is easy to install.
