

## Complex Engineered Foam Solutions

With a growing demand for more complex foam components in the markets we serve, Ideal Jacobs provides multiple solutions to fabricate foam into custom geometric configurations by incorporating a variety of production methods. These methods include but not limited to: **thermo forming, compression molding, CNC machining, fixture cutting, vibration knife cutting** etc.

Ideal Jacobs holds an inventory of raw materials through different channels providing customers with integrated solutions that include raw material procurement, CNC machining, and professional engineering and customer support. It is our goal to offer the best solutions for any complexity.

Thermo Forming

Compression Molding

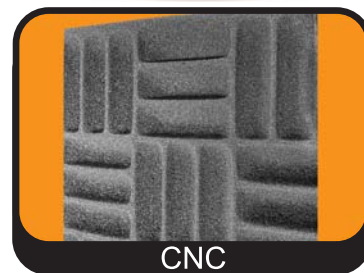

Fixture Cutting

CNC

Vibration Knife Cutting

### Material Brands

Basotect	
Armacell	
Rogers	
Inoac	
Ultem™ Foam	
Rubberlite	
Recticel	
Plastazote	

### Advantages

- ◆ Global Operation and Service Centers
- ◆ Professional Engineering and Customer Service
- ◆ Competitive Raw Material Sources
- ◆ Quick Production Lead Time
- ◆ Flexible MOQ Support
- ◆ Reliable Quality Guaranteed

### Applicable Areas

- ◆ Medical Devices
- ◆ Industrial Devices
- ◆ Optical Network
- ◆ Telecom Devices
